Purpose:
- To address the gap and reduce disparities in research participation in Alzheimer’s disease and related dementias, aging, caregiving, and other health issues across the lifespan among Asian American, Native Hawaiian, and Pacific Islander (AANHPI) communities.
- Implement culturally appropriate and innovative recruitment strategies in collaboration with CARE’s community partners to enroll 10,000 AANHPI participants.
- CARE aims to give AANHPI communities a voice and the opportunity to participate in research through enrollment in CARE.

Enrollment number:
9,759 participants as of January 1, 2023

Demographics of CARE Participants

- Vietnamese (37.4%)
- Chinese (33%)
- Korean (16.7%)
- Asian Indian (5.6%)
- Filipino (3.9%)
- Japanese (2.5%)
- Native Hawaiians & Pacific Islanders (2.1%)
- Other (3%)
- More than one (1%)

- Mean age: 53.4 (Range 18-100)
- Female: 62.6% | Male: 35.7%
- 81% of participants do not have previous experience with research
- 13.2% of participants have self-reported ADRD-related symptoms
- 24.5% of participants are currently caregivers

Research Areas

- 44 (67.7%) of the requesting studies were aging-related, including ADRD or caregiving studies.
- Others focused on a wide range of topics, including COVID-19, cardiovascular disease, contraceptive decision-making, etc.

Outreach Activities

- Conducted 188 outreach activities as of Jan 2023
