

## Executive Summary from the CARE Registry October 2020 ~ March 2022

A Focus on Asian American & Pacific Islander (AAPI) Communities and Aging

**Launch Date:** October 15, 2020

**Enrollment number:**  
7,810 participants as of March 13, 2022

CARE has received 36 recruitment referral requests from January 2021 through March 2022

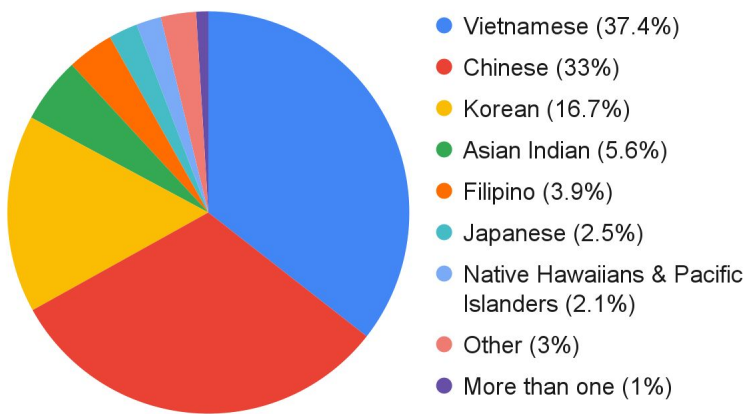

### Background:

- Asian Americans are the fastest growing racial group in the US, comprising 7.7% of the population <sup>1</sup>
- Clinical research projects focusing on Asian American and Pacific Islander (AAPI) participants funded by the National Institutes of Health was less than 1% of its total budget between 1992 and 2018 <sup>2</sup>

### Purpose:

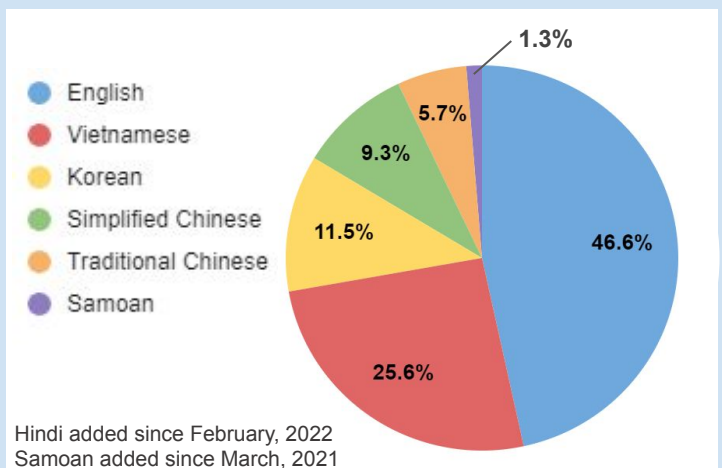

- To address the gap and reduce disparities in research participation in Alzheimer's disease and related dementias, aging, caregiving, and other health issues across the lifespan among AAPIs.
- Implement culturally appropriate and innovative recruitment strategies in collaboration with CARE's community partners to enroll 10,000 AAPIs.
- CARE aims to give AAPIs a voice and the opportunity to participate in research through enrollment in CARE.

### Demographic of CARE Participants

- ❑ **80.2%** of participants do not have previous experience with research
- ❑ **11.4%** of participants have self-reported ADRD-related symptoms
- ❑ **25.9%** of participants are currently caregivers

### Language of Survey Completion

**59.5%** have limited English proficiency
