

CARE Registry 2024 ANNUAL BRIEF REPORT

Established: October 15, 2020

3rd Annual Brief Report

What's inside in this report:

[How does the CARE registry works?](#)

[Who enrolled in CARE?](#)

[CARE participant characteristics](#)

[CARE-supported research studies](#)

[Researcher testimonials](#)

[How did CARE engage Asian Americans, Native Hawaiians, and Pacific Islander \(AANHPI\) communities?](#)

[CARE's vision and next steps](#)

Funder: Research reported in this publication was supported by the National Institute on Aging of the National Institutes of Health (R24AG063718 & R01AG083926). The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health. **UCSF IRB Protocol #:** 23-39121

CARE has **10,257** participants
(as of August 31, 2024)

Because of your participation,
CARE supported **80** health research studies!

Background:

Asian Americans, Native Hawaiians, and Pacific Islanders (AANHPI) are the **fastest growing racial groups** in the US, comprising **8%** of the population.

However, **less than 1%** of total budget between 1992 - 2018 from the National Institutes of Health (NIH) were for AANHPI research.

[\(Doan, Takata, Sakuma, & Irvin \(2019\), JAMA Network Open\)](#)

< 1%

Mission: To improve research participation and reduce health disparities on Alzheimer's disease, aging, caregiving, and other health issues in AANHPI communities.

Languages: (Enrollment survey available in these languages)

English

简体中文 (Simplified Chinese)

繁體中文 (Traditional Chinese)

हिन्दी (Hindi)

Ilokano (coming soon)

日本語 (Japanese)

한국어 (Korean)

Sāmoa (Samoan)

Tagalog

Tiếng Việt (Vietnamese)

How does the CARE registry work?

This is how we increase representation of AANHPI adults in research and improve our community health!

PARTICIPANT (YOU)

ENROLL IN CARE

You complete a brief survey to enroll in CARE

SECURE DATABASE

Your information is saved in CARE's secure database*

WE MATCH YOU!

We connect researchers with participants who might be eligible for studies. You may be contacted by email, phone, text, or postal mail.

YOU DECIDE IF YOU WISH TO PARTICIPATE

THERE'S NO COST TO YOU

RESEARCHER

REFERRAL REQUEST

Researchers submit an application to CARE

OBTAIN APPROVAL

Researcher gets approval to use CARE data from their Institutional Review Board**

*CARE's database is HIPAA compliant, meaning it follows security measures to store protected health information.

** An Institutional Review Board (IRB) is made up of qualified individuals who carefully review research involving human participants. They ensure that these studies are ethical, follow all laws, and protect participants' rights and safety.

Who enrolled in CARE? (N=10,257)

Age

- Range: 18 - 101 years
- 62% were 50 years or older
- 35% were 65 years or older

Gender

- Female
- Male
- Other, such as but not limited to transgender and unsure (0.2%)
- Prefer not to answer (1.5%)

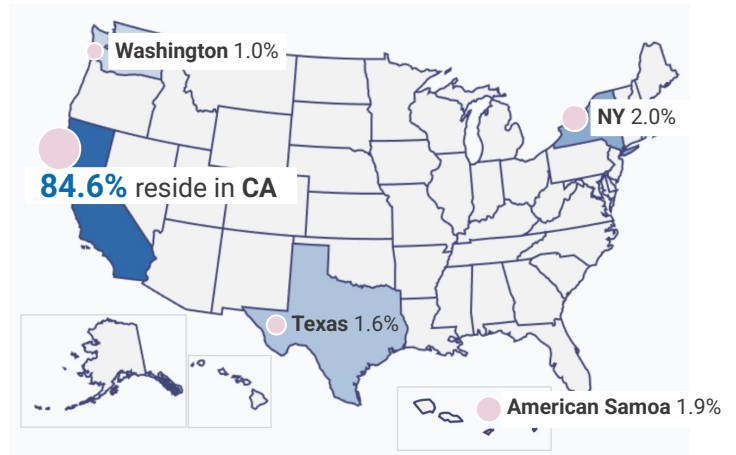

Language of survey completion

- English
- Vietnamese
- Korean
- Simplified Chinese
- Traditional Chinese
- Samoan (Samoan since March 2021)

Regions

50.1% have **limited English** proficiency

83.2% born outside the US

AANHPI Cultural Groups

* Chamorro, Tongan, Fijian, Marshallese etc.,

** Nepalese, Pakistani, Cambodian and Hmong... etc.

CARE participant characteristics (N=10,257)

Commonly Reported Health Conditions

Prior research participation experience

● Yes ● No ● Not sure

80.3% of participants **did not** have previous participation experience

Caregiving

1/4 of participants are current caregivers

Among caregivers (n=2,525):

63.0% are caring for **minor children** (≤ 18 years old)

38.1% are caring for **older adults** (aged ≥ 50)

6.3% are caring for other **individuals with special needs**

7.0% are caregivers to **more than one group**

[Read our Caregiver Stories](#)

"And I remembered thinking that it really did take a lot of love and compassion, and a lot of patience to become a caregiver especially [for] those with dementia..."

S.T.

"Research is very important to help people live out a dignified life. I'm angry because I feel they are being robbed of fully enjoying a wonderful fulfilled life that they both deserve."

J.Y.

CARE-supported research studies

How has CARE made an impact in AANHPI populations' representation in research?

Because of your participation in CARE,

we are able to support researchers in recruiting AANHPI participants for their studies.

recruitment referral requests received since January 2021.

studies received referrals from CARE.

27 more studies are in the preparation stage (e.g., awaiting IRB approval), and 17 did not receive support after consultation.

referrals were made to CARE-supported studies.

Referral outcome findings will be available soon.

With your help, we are actively enhancing the representation of **AANHPI communities in health research**, and this is just the beginning. **Thanks for your support!**

Languages Supported by Referred Studies

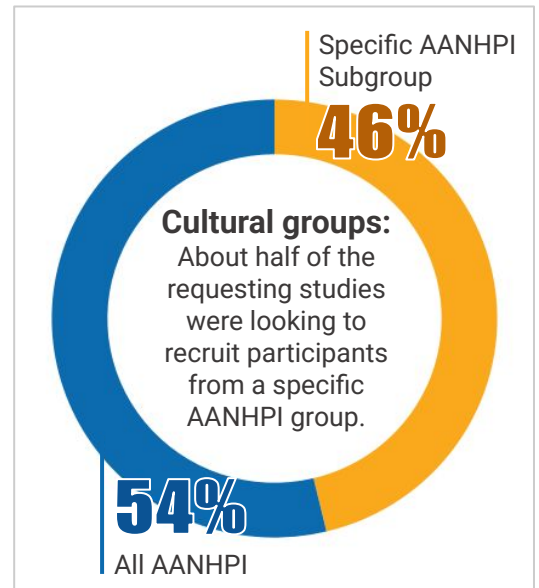

Research Areas

53 (66.3%) of the requesting studies were aging-related, including ADRD or caregiving studies.

Others focused on a wide range of topics including COVID-19, cardiovascular disease, cancer and mental health.

[View](#) past **Brain Trust Meeting** recordings and learn about the referral request process.

Researcher testimonials

"It's [a] very, very easy registration process[...] The CARE registrants we reached out to were already interested in research and once they are enrolled in our study, they are very committed."

Dr. Christina Miyawaki | Associate Professor, Univ. of Houston

"I am extremely impressed with the attention paid to the different demographic and caregiving information that was collected. I was able to specifically request those who [...] met the] specific criteria [for my study...] and the response rate was surprisingly high."

Dr. William Tsai | Assistant Professor, New York University

"Our study has a large sample of American Samoa adults that requires a community engagement process to build trust to begin recruitment. The CARE registry allowed us immediate access to eligible participants to recruit, while our team engaged the community to recruit more eligible participants."

Va'atausili Tofaeono | Executive Director, American Samoa Community Cancer Coalition (ASCCC)

"A registry like CARE is very important for clinical research recruitment from underserved populations. It saves researchers' time in recruitment and allows innovative research to take place immediately."

Dr. Alicia Hong | Professor, George Mason University

How did CARE engage AANHPI communities?

Conducted **246 outreach activities** as of September 2024

We're just getting started to make a difference together!

CARE's vision and next steps

Sustain CARE's existing infrastructure, including our multicultural and multilingual team, and collaborate with academic and community partners

Provide continual outreach, education, and engagement to AANHPI communities to recruit another 10,000+ participants

Provide continual education & outreach to the research community

Strategically expand CARE with targeted efforts to other states beyond California

Improve CARE's reach with some AANHPI communities such as Filipino, Japanese, Native Hawaiians, Pacific Islanders, & South Asians

Expand on CARE's reach with AANHPI with limited English proficiency and limited access to digital technology
